Advancing the IGF through the SDG Data Alliance

FOUNDING PARTNERS

Antonio Guterres

United Nations Secretary General
11th October 2022

“We need your geospatial expertise on two fronts:

- To measure progress and
- To make progress.

We need you to drive forward innovation and action through the power of data – focused on the most marginalised and vulnerable communities and places.”

What is the SDG Data Alliance?

The SDG Data Alliance was formed to **bring GIS technology capabilities, resources and training** to developing countries (especially LDCs and SIDS) with the goal of accelerating the **achievement of the SDGs.**

The SDG Data Alliance is an open, community-driven, **multi-stakeholder partnership comprising of the private sector, foundations, UN organizations, and local and national governments.**

The SDG Data Alliance has two key deliverables

- (1) The country develops its own **UN IGIF country-level action plan** to improve national geospatial information management, an essential element of national digital infrastructures.
- (2) The country develops a **national SDG data hub** to enable monitoring of achievement of the SDGs by goal, target, and indicator. (This is initiated at a point when the action plan development is sufficiently progressed).

Country-led, country-delivered

The SDG Data Alliance has two key deliverables: (1)

(1) The country develops its own **UN IGIF country-level action plan** to improve national geospatial information management, an essential element of national digital infrastructures.

- A country-level action plan provides specific steps towards achieving the short-term and long-term strategic goals for strengthening national integrated geospatial information management.
- It is national, requiring collaboration across Government.
- It uses the UN IGIF as a framework

UN approach to Country Action Plan development

Component 1
Project Planning
and Preparation

Project Plan

1. Project Initiation and Pre-needs Assessment
2. Stakeholder Identification and Analysis
3. High-level Project Plan (to design and develop country-level Action Plan)

Broad range of benefits, including SDGs, results in needing to engage with wide range of cross-government, industry and funder stakeholders, often for the first time

Enabled citizen

Smart urban planning

Resource management

Emergency Services

SDG delivery/measurement

Water and health

Trade

Resource security

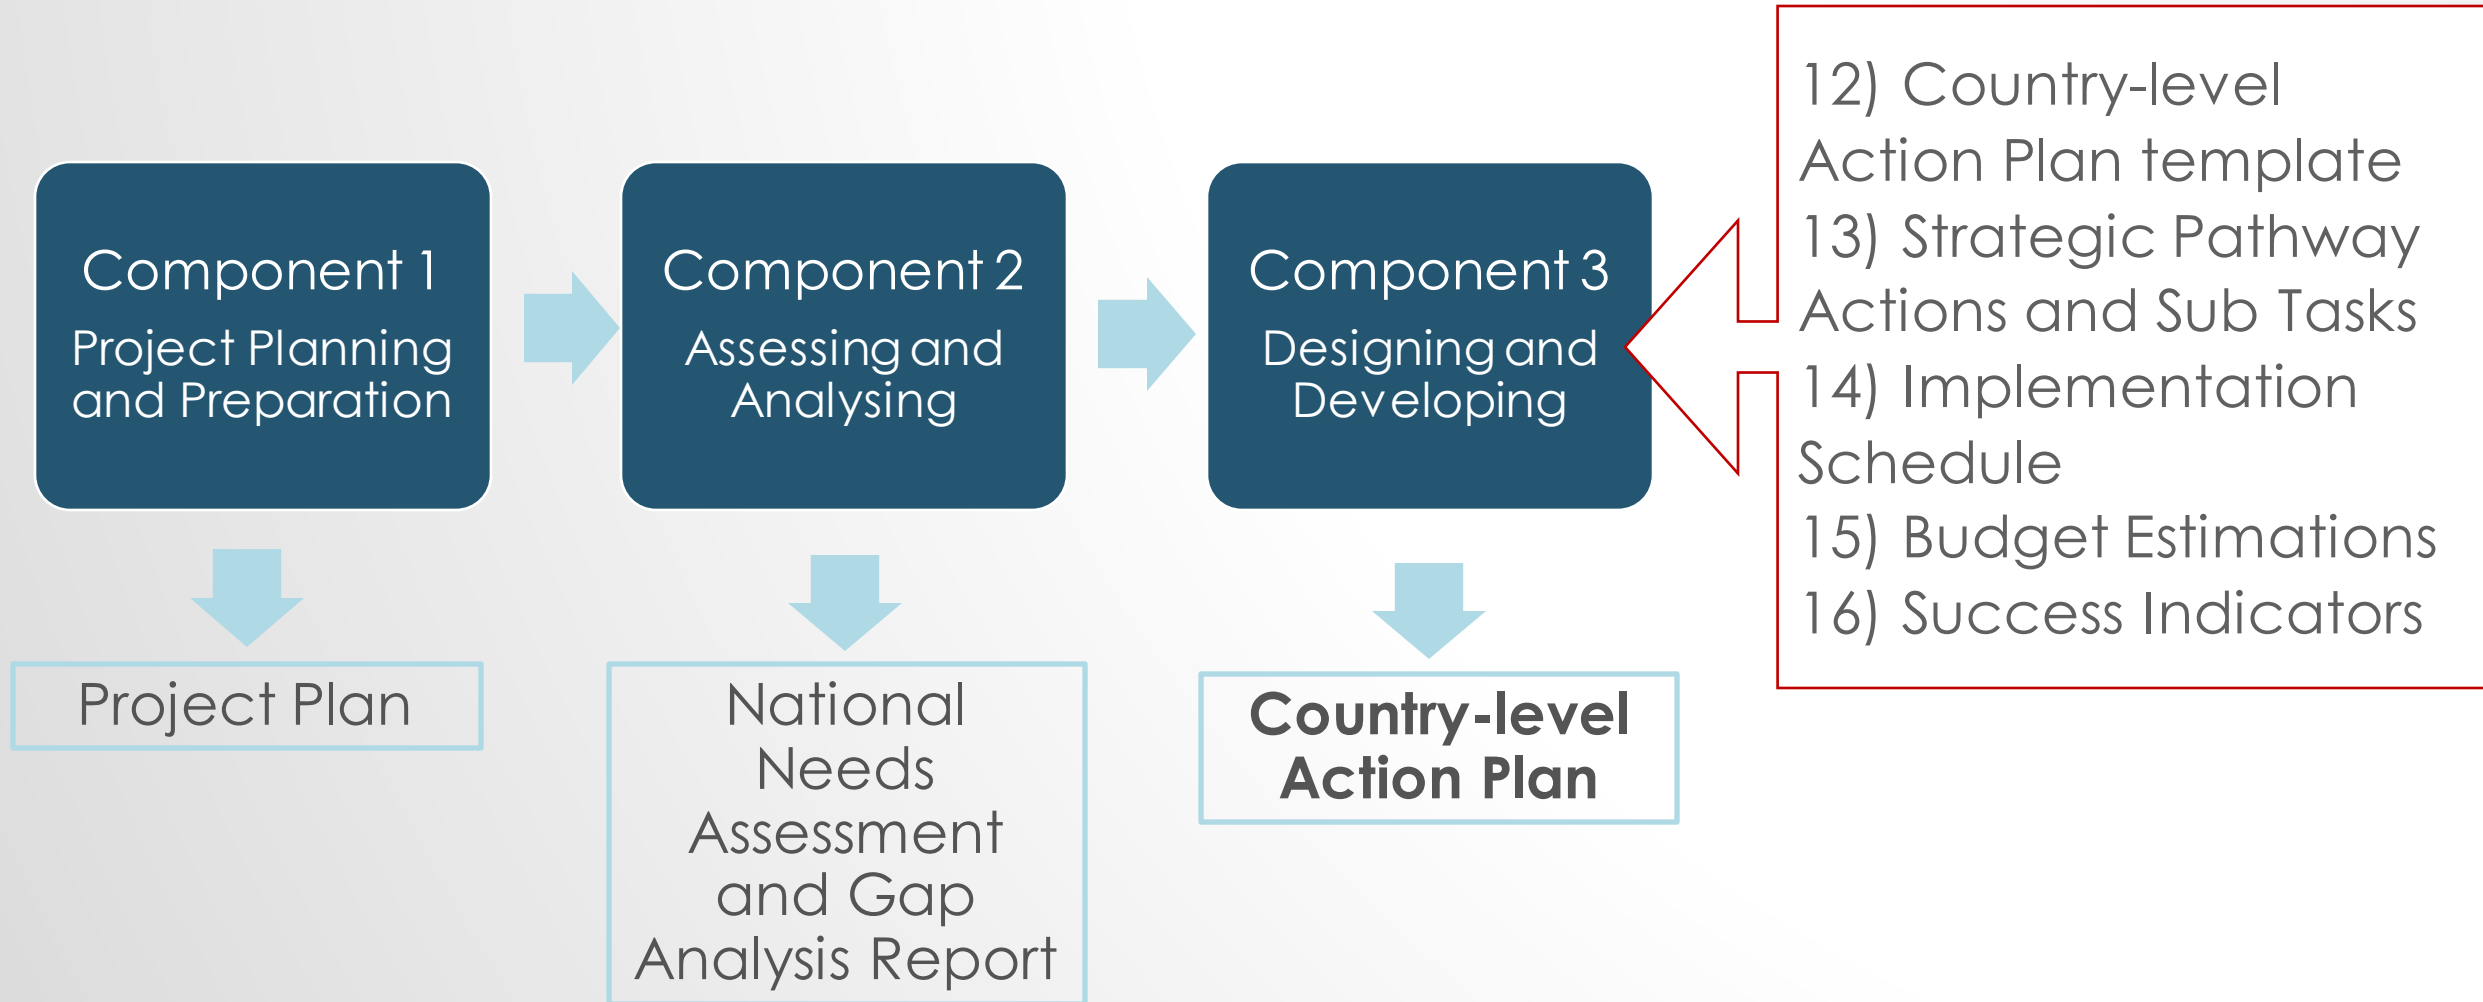

UN approach to Country Action Plan development

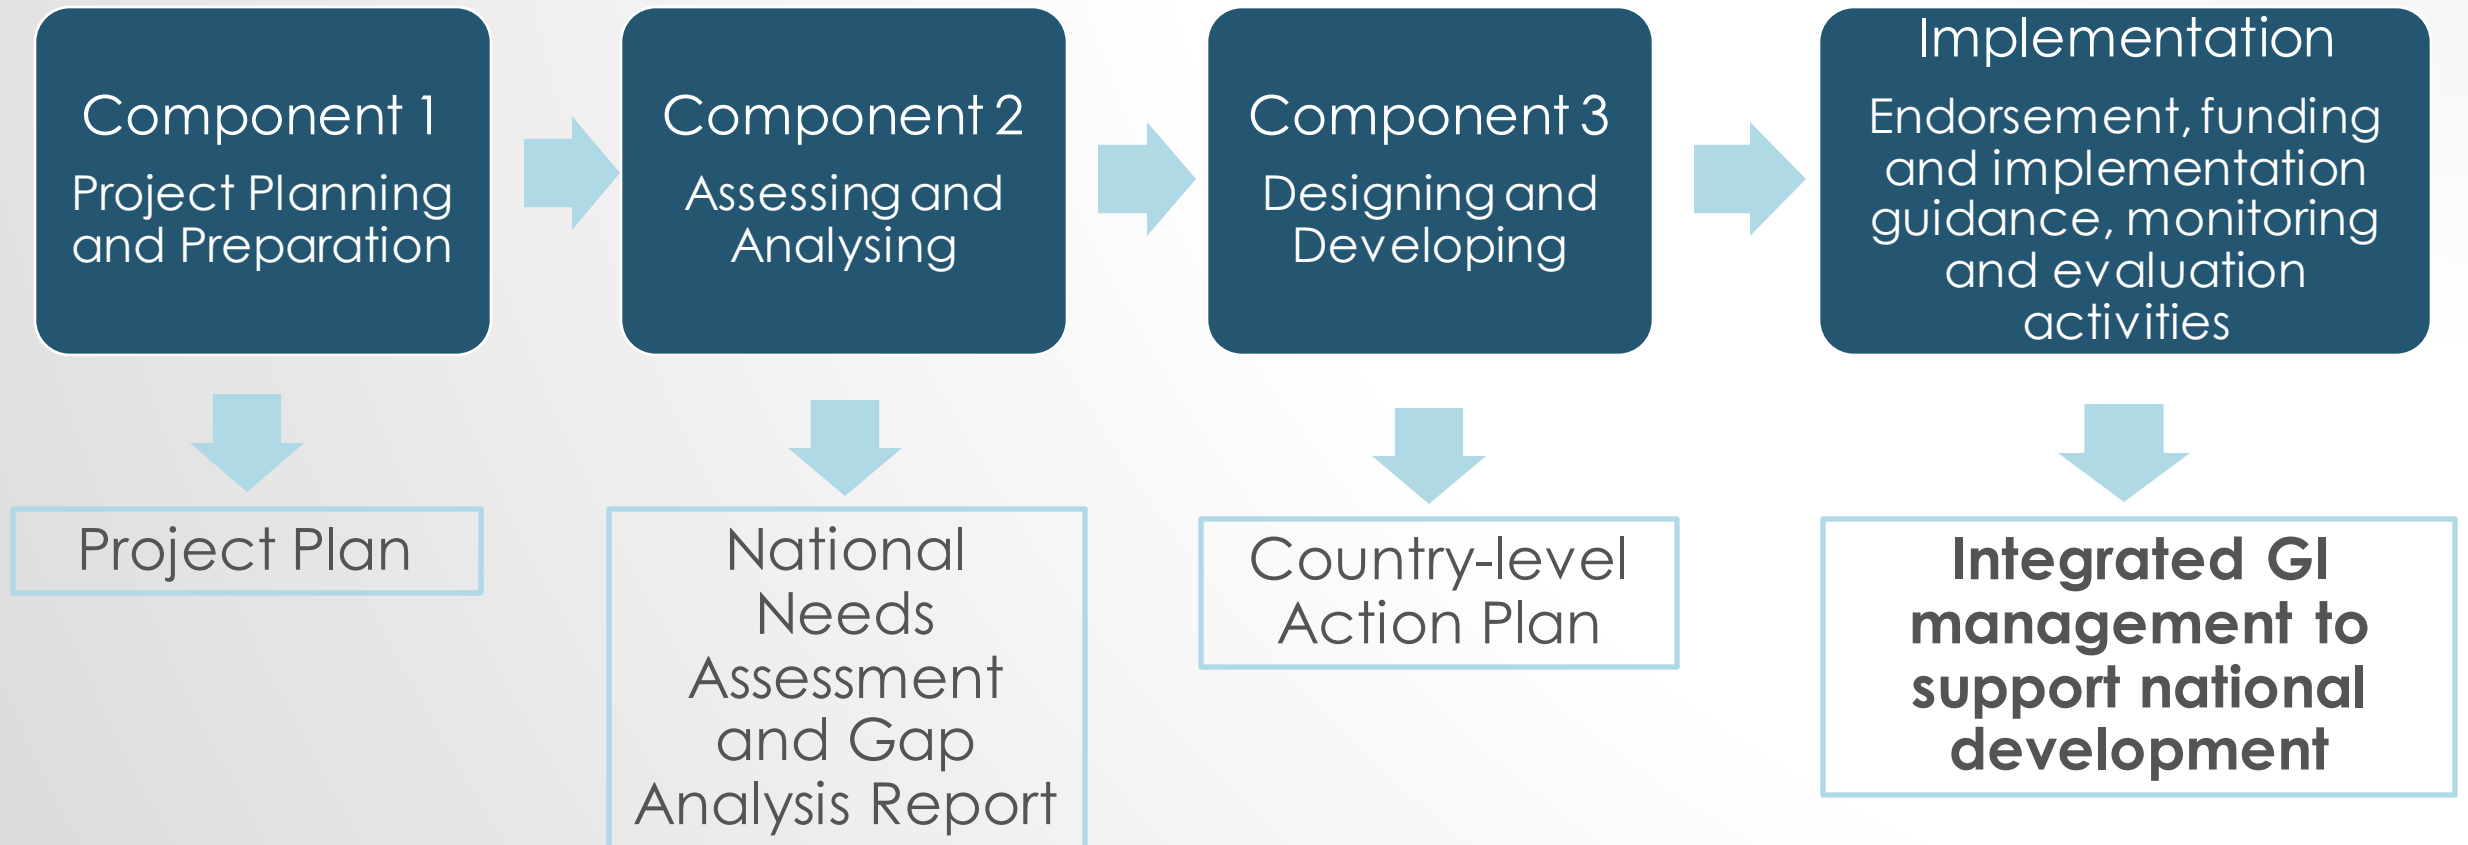

Impulsores estratégicos	Evidencia de la prioridad estratégica del gobierno	Tema geoespacial	Beneficio de la información geoespacial	Situación actual	Prioridad de inversión
<p>Ejemplo</p> <p>Lograr una mejor prestación de servicios desde la perspectiva de un ciudadano</p>	<p>Estrategia de Administración Electrónica 2017-2025</p> <p>La estrategia tiene como objetivo simplificar la entrega de información y ciudadanos por insatisfacción fragmentada</p>	<p>Información accesible</p>	<p>El acceso a la información geoespacial permite a los usuarios completar una interacción con el</p>	<p>La información geoespacial no es accesible actualmente</p> <p>No existe una política</p>	<p>Alto</p>
<p>Ejemplo</p> <p>Reducir la incidencia de los desplazamientos urbanos</p>	<p>Plan de Gestión 2020</p> <p>El Plan tiene como objetivo reducir las inundaciones en las zonas urbanas al poder predecir las áreas de vulnerabilidad a las inundaciones y hacer planes para garantizar la seguridad pública.</p>	<p>Modelos de riesgo de inundación</p>	<p>comprender el riesgo para los seres humanos y la infraestructura. Requerido para el desarrollo urbano y la planificación de inversiones</p>	<p>urbanas no está disponible</p> <p>No existe un modelo digital de elevación de las zonas urbanas</p> <p>Se requiere el desarrollo de capacidades en LiDAR y DEM</p>	<p>Alto</p>
<p>Ejemplo</p> <p>Reducir la contaminación de los medios para proteger los futuros recursos hídricos</p>	<p>Plan Maestro de Desarrollo de País hasta 2025</p> <p>Uno de los objetivos es mejorar la calidad del agua potable. El plan establece las directrices y políticas para la gestión de residuos industriales con el fin de proteger el medio ambiente y garantizar la seguridad de la comunidad.</p>	<p>Monitoreo de la calidad del agua</p>	<p>Esencial para analizar cómo los residuos industriales afectan la calidad del agua y las comunidades aguas abajo.</p>	<p>Se desconoce la ubicación de la actividad industrial a lo largo de las vías fluviales.</p> <p>No hay sensores de calidad</p> <p>Se requiere la creación de capacidad para mantener y utilizar los datos</p> <p>Se requieren permisos y</p>	<p>Alto</p>

Explanation, methodology, tools and templates for all tasks

UN approach to Country Action Plan development

UN approach to Country Action Plan development

Lessons

KINGDOM OF TONGA

STRENGTHENING ARRANGEMENTS TOWARD
AN INTEGRATED GEOSPATIAL MANAGEMENT

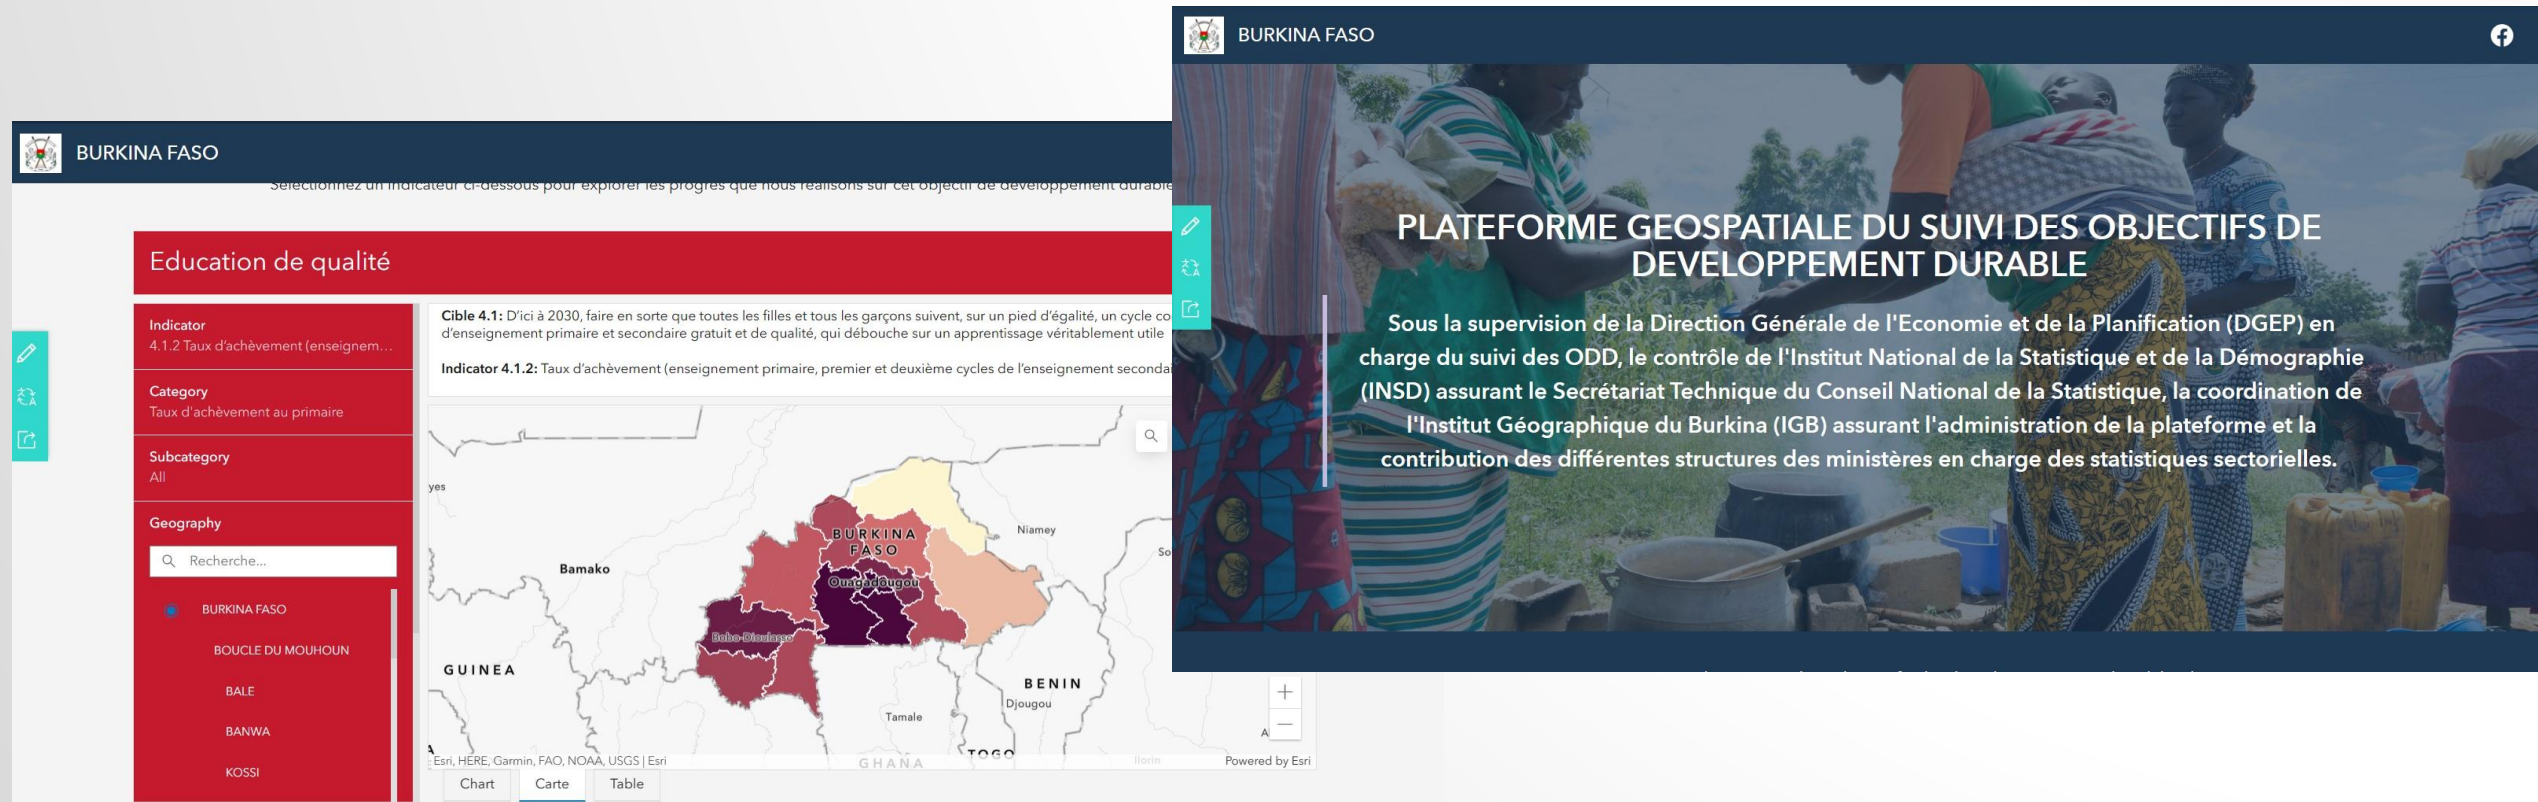

Final draft endorsed: 21/06/2022

- UN IGIF as a framework is working.
- Country-led, country-delivered – it works.
- Greater link to implementation guide.
- National not institutional.
- Importance of Engagement.
- Range of Stakeholders.
- Senior ‘buy-in’.
- CAP is a plan - think of implementation
- Disaggregated SDG statistics
- Project team resources and time
- Learning by doing
- Ownership

The SDG Data Alliance has two key deliverables (2)

(2) The country develops a **national SDG Data Hub** to enable monitoring of achievement of the SDGs by goal, target, and indicator. (This is initiated at a point when the action plan development is sufficiently progressed).

The image shows a screenshot of the Burkina Faso National SDG Data Hub interface. The interface is in French and displays the following information:

- Header:** BURKINA FASO
- Navigation:** Selectionnez un indicateur ci-dessous pour explorer les progrès que nous réalisons sur cet objectif de développement durable.
- Category:** Education de qualité
- Indicador:** 4.1.2 Taux d'achèvement (enseignem...)
- Category:** Taux d'achèvement au primaire
- Subcategory:** All
- Geography:** BURKINA FASO, BOUCLE DU MOUHOUN, BALE, BANWA, KOSSI
- Map:** A map of Burkina Faso showing regional boundaries and major cities like Bamako, Niamey, and Djougou. The map is powered by Esri.
- Text Overlay:**

PLATEFORME GEOSPATIALE DU SUIVI DES OBJECTIFS DE DEVELOPPEMENT DURABLE

Sous la supervision de la Direction Générale de l'Economie et de la Planification (DGEPE) en charge du suivi des ODD, le contrôle de l'Institut National de la Statistique et de la Démographie (INSD) assurant le Secrétariat Technique du Conseil National de la Statistique, la coordination de l'Institut Géographique du Burkina (IGB) assurant l'administration de la plateforme et la contribution des différentes structures des ministères en charge des statistiques sectorielles.

SDG Data Alliance Resource Team

- Guidance as countries conduct the tasks towards their UN IGIF country-level action plan .
- Provide and explain the tools, templates and other task material.
- Help resolve issues and give feedback on completed tasks.
- Support workshops.
- Provide specific training.
- Coordinate and deliver learning opportunities.
- When ready, guide and support deployment of SDG Data Hubs.
- Support the progress from country-level action plan to implementation.
- Support countries gain value from SDG Data Hubs

SDG Data Alliance Workshops, Aug 17-18 Cape Town, South Africa

Capacity development and knowledge transfer elements of the UN-GGIM Africa and ICC meetings.

Country experiences

Enabling African Member States to accelerate the implementation of national UN-IGIF Country-level Action Plans and the deployment of SDG data hubs.
