- **PERSPECTIVES**
- **SOME GOOD PRACTICES**

INTRODUCTION

We have completed the CAP and have set up the SDGs Data Hub. Discussions have been initiated with the National Institute of Statistics for the establishment of 'a stakeholder platform for the day-to-day management of the SDG Data Centre. I must acknowledge today that there is a leadership dispute that will certainly be resolved upon my return. The National Workshop on the CAP does not is still not scheduled.

ADVANTAGES

- - Brings together stakeholders who were not cooperating together before
- - Understanding of national geospatial issues
- - Promotes rapprochement between actors and strengthens exchanges
- - Availability of quality geospatial information
- - Improvement of the data collection, storage and dissemination system

CHALLENGES

- - The Presidential and legislative elections in 2025-
- Lack of resources available for implementation
- - Training of stakeholders
- - Animation of the platform
- - The adhesion of the Ministries of sovereignty to the process
- - Waiting for the date of the National Workshop (Service of the Prime Minister Head of Government)

PERSPECTIVES

- - Increase communication and contacts with stakeholders
- - Increase meetings with high-level managers.

The screenshot shows the website for the SDG Data Cameroon Hub. The header includes the logo and navigation links: "Le Cameroun", "Visualiser les ODDs", "Catalogue de Données Ouvertes", "Etat de Suivi des Indicateurs", and "A Propos". The main content area features a large image of a road and a circular graphic of the 17 Sustainable Development Goals (SDGs). The text reads: "PLATEFORME DE SUIVI GÉOSPATIAL DES OBJECTIFS DE DÉVELOPPEMENT DURABLE AU CAMEROUN". Below this, a paragraph describes the platform's leadership by the Institut National de Cartographie (INC) and Institut National de la Statistique du Cameroun (INS), supported by SDG DATA ALLIANCE, and its role in monitoring the 2030 Agenda. It lists participating ministries: MINEPAT (DGPAT), MINADER, MINFOF, MINEE, MINMIDT, MINTP, MINSANTE, and MINHDU.

SOME GOOD PRACTICES
