

ON THE OCCASION OF THE FIFTEENTH SESSION OF UN-GGIM

AUG 6–8, 2025, UN HQ, NEW YORK

Frank Tierloff

Chair of the Board, Kadaster,
The Netherlands & Co-Chair
UN-GGIM Europe

HE Mohammad Al Sayel

President, GEOSA, Saudi Arabia
& Chair, UN-GGIM
Arab Committee

Deirdre Dalpiaz Bishop

Chief of the Geography Division
US Census Bureau, USA
& Co-Chair, UN-GGIM

Eng Hamed Khamis Saif Al Kaabi

Director - General
FGIC, UAE

Dean Angelides

Corporate Director - International
Esri, USA

Greg Scott

Executive Director, SDG Data Alliance
PVBLC Foundation, Australia

Sanjay Kumar

Chief Executive Officer
Geospatial World, India

Annu Negi

President - GW Events
Geospatial World, India

Cordially Invite you to the Dinner Reception Celebrating the Launch of GWF 2026

Date: 7 August 2025

Venue: Utsav Restaurant, 1185 6th Ave, New York, United States

Time: 18:30 hrs onwards

GWF
GEOSPATIAL WORLD FORUM
CONFERENCE & EXPO

**Theme: Sovereignty,
Economy & Society**

28 April - 01 May 2026
RAI Congress Centre, Amsterdam

RSVP

Gabriela García Seco, Associate Director - GKI, Geospatial World,
gabriela@geospatialworld.net | +34 603 63 4429

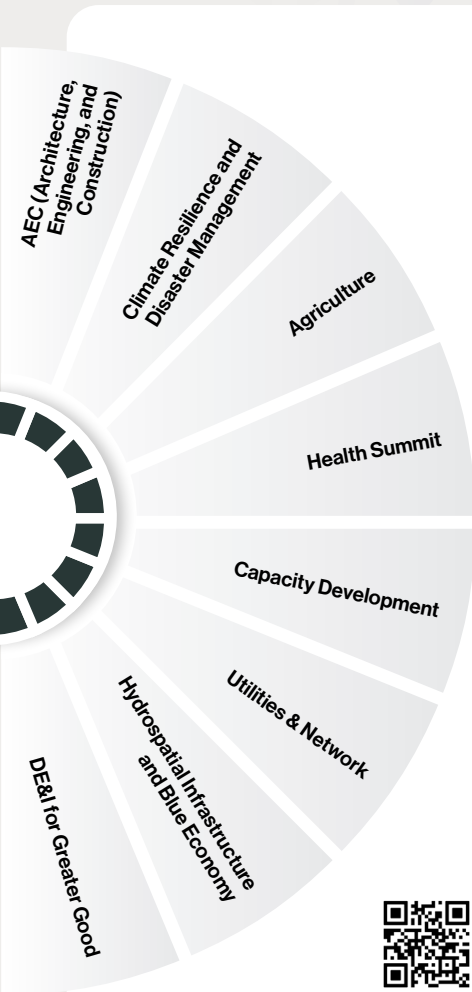

**GEOSPATIAL
WORLD**
ADVANCING KNOWLEDGE FOR SUSTAINABILITY

Agenda for the Evening- 7 Aug 2025

18:30 - 19:00 | Social Networking

19:00 - 19:30 | Launch of Geospatial World Forum 2026

19:30 - 21:00 | Continuation of Social Networking alongside Dinner

Know More

Programs at a Glance - GWF 2026

- **Architecture, Engineering & Construction (AEC):** Supports SDG 9 & 11, with smart infrastructure and green design contributing to resilient cities and reducing 37% of global construction-related CO₂ emissions.
- **Climate Resilience & Disaster Management:** Advances SDG 11 & 13, with early warning systems and geospatial risk mapping reducing disaster-related deaths by 65% since 2000 in high-risk regions.
- **Agriculture:** Tied to SDG 2 & 15, the sector employs 27% of the global workforce, with geospatial tools enhancing yield, soil health, and sustainable land use.
- **Health:** Promotes SDG 3; geospatial and data-driven solutions help track disease outbreaks—e.g., satellite data supported 70+ countries in managing COVID-19.
- **Capacity Development:** Supports SDG 4, 8 & 17; with over 50% of the global workforce requiring upskilling by 2025, geospatial education and training build institutional resilience and empower informed decision-making.
- **Utilities & Network:** Contributes to SDG 7, 9 & 11 by enabling access to clean energy, optimizing power grids, and enhancing service delivery through spatially enabled asset management systems.
- **Hydrography:** Supports SDG 14 & 9; with 71% of the planet covered in water, hydrographic data informs marine ecosystem protection and resilient infrastructure.
- **Diversity, Equity & Inclusion (DE&I):** Aligns with SDG 5 & 10, as inclusive policies foster equal opportunity—yet women still represent only 28% of the STEM workforce globally.

Geospatial World Forum will spotlight discussions across the sectors mentioned above & more—showcasing how geospatial technologies empower these sectors in accelerating progress toward the UN Sustainable Development Goals.
