

GSDI

Global Spatial Data Infrastructure (GSDI) Association

IEEE Geoscience and Remote Sensing Society (IEEE-GRSS)

International Association of Geodesy (IAG)

International Cartographic Association (ICA)

International Federation of Surveyors (FIG)

International Geographical Union (IGU)

International Map Industry Association (IMIA)

International Society of Photogrammetry and Remote Sensing (ISPRS)

Urban and Regional Information Systems Association (URISA)

Support the work of the UN-GGIM while leverage their global networks which are typically thematically organized and aligning these with working group topics

- Provide a collective and unified voice at the international level regarding geospatial affairs
- Recognize its value as a mouthpiece of GGIM to their members and vice versa
- Respond with proposals on how to deliver the collective requirements of governments
- Concentrate on tangible activity/products

(‘continuously’ redefine its purpose/mandate - information exchange among its members is an other important pillar of UN-GGIM Geospatial Societies)
